of the European Union

The ViRAL project starts now!

The kick-off meeting of the ViRAL-Virtual Reality Archive Learning project took place in Dornbirn, Austria, from 14th to 16th October 2018, bringing together partners from different backgrounds – culture, education and science –, from Austria, UK, Sweden, Croatia, Portugal and Germany.

ViRAL is an Erasmus+ project based on the values of heritage safeguard and educational skills. The main goal of ViRAL is to use content generated from the industrial heritage (material and immaterial) of each of the cities involved in this program to create digital tools that will then be used in adult non-formal education sessions (seniors, factory employees, vocational and technical education, cultural and heritage professionals). With a starting point in the archives and cultural heritage across Europe's post-industrial communities, specifically using five archives/museums from Dornbirn (AT), Wuppertal (DE), Osijek (HR), Torres Novas (PT) and Coventry (UK), the project ViRAL aims to develop new skills and key competences in adults with scarce job opportunities through new virtual reality (VR), augmented reality (AR) and 360-degree movies (360) technology tools and documentary methods.

The next meeting of ViRAL partners will take place in Torres Novas, Portugal, in February 2019. In the meanwhile ViRAL is in progress and all news about the project can be read on ViRAL Facebook page.
